# Your visit summary

AI AT 70 · HEALTH FOR ALL AGES

Patient: **Rosa Gómez** Visit date: **October 31, 2026**

## Your visit

You came in for your medicine review. The doctor thinks you have hypothyroidism and osteoarthritis of the right knee. Hypothyroidism is when your thyroid doesn't make enough thyroid hormones. Osteoarthritis is a type of joint inflammation that only affects the joints.

## Your medicines

**Thyroid medicine (Levothyroxine)** Higher dose

➜ **Take 1 pill (75 mcg) each day before breakfast.**

**Pain medicine (Ibuprofen)** Stopped

➜ **Stop taking this.**

**Pain medicine (Acetaminophen)** New

➜ **Take 1 pill (650 mg) every 8 hours as needed for knee pain.**

## What to do next

- You will be sent to a physical therapist for balance.
- Go to the lab in 6 weeks for a blood test (TSH).
- Go to your follow-up visit in 6 weeks with Dr. Lee.
- **Call the office if you fall again.**
